

# FLUID MANAGEMENT TANK

Applications in clear water drilling, surface hole, mud-up section, de-watering of drilling fluids, premix drill fluids, premix lost circulation material, stripping of drill fluids, floccing, and closed loop systems.

## Advantages

- Reduces water usage
- Cleaner drilling fluid
- Increased rate of penetration
- Reduced formation damage
- Reduced chemical usage
- Reduced vac truck costs

- Eliminates the need for separate polymer injection tank
- Independent fluid transfer system
- Roughneck heater
- Designed for cold weather operation
- 12' W x 6' H x 50' L
- Combined load reduces transportation costs

## Specifications

- 300 bbl (48 m<sup>3</sup>)
- Three injection pumps with variable speed controls
- 6" mud roll
- 60 hp Mission pump
- Interior and exterior lighting
- Clean out gates
