

POLYMER INJECTION TANK

Advantages

- Manifold to control water volumes while mixing.
- Steam coils and drain plugs for cold weather operation.
- Three injection pumps each powered by a 2 hp electric motor with variable speed controls.
- Two gear-driven agitators, each powered by a 2 hp electric motor.

Equipment specifications

- Two compartment open top tank
- Volume: 10 m³
- Quartz halogen lighting
- 208 V single phase power requirement
- 25 mm injection lines
- 50 mm manifold valves
- 5' H x 6.5' W x 15' L
