

STRIPPING CENTRIFUGE CONTROL TANK

Advantages

- An all-in-one tank that can manage your drilling mud and centrifuge processing.
- One unitized load.
- Reduces water consumption.
- Reduces transportation costs.
- Cleans drill fluid for disposal.
- Closed-loop drilling system.
- Built-in polymer injection tank.
- Adjustable stairs.
- Hydraulic centrifuge stand.

Equipment specifications

- Separate compartments with mud guns and suction controls
- 375 bbl capacity
- Polymer injection tank: 10 m³
- Power requirements: 480 V 30 A (3 W 4 P)
- Dimensions: 11' H x 12.5' W x 57' L
- 33.4 ft² screening area
